

# Yealink Handsets

*We supply a large range of handsets in addition to Yealink. Our range includes Polycom, Panasonic, V-tech and H-Tek. However we can auto-provision Yealink handsets and configure them so we can make remote changes. This allows us to resolve problems and change your internal set-up without the need for engineer visits.*

# Yealink T19PN

## Overview

The new Yealink T19PN is an entry-level IP phone that offers features and performance normally associated with much more advanced phones.

The T19PN has a 5-line graphical clear LCD display (132 x 64-pixel) which guarantees both a smoother user experience and easy access to much more visual information at a glance. It has dual 10/100 Mbps network ports with integrated Power-over-Ethernet (PoE). The SIP-T19P supports a single VoIP account, which can be automatically provisioned by EMtel.

# Yealink T21PN

## Overview

The Yealink T21PN is an entry-level IP phone, with a large 132 x 64 pixel graphical LCD display showing 5-lines of clear data which offers a smooth user experience.

The T21PN has dual 10/100 Mbps network ports with integrated PoE, ideal for extended network use. This phone is very cost-effective and powerful IP solution, which helps to maximise productivity in both small and large office environments.

# Yealink T23GN

## Overview

The Yealink T23GN is a cost effective business class handset which supports up to 3 SIP accounts and has a built in two-port Gigabit Ethernet switch. The user interface is intuitive and with its enhanced functionality the phone makes it really easy for people to use and maximise day to day productivity. New to the T23GN is the support of Dual-colour (red or green) illuminated LEDs for line status information. Yealink's HD Voice uses wideband technology to maximise the acoustic performance for clearer voice communications.

# Yealink T27G

## Overview

The T27G is a highly featured IP desk phone which supports up to 6 SIP accounts and comes complete with 2 x Gigabit Ethernet ports for high-speed connectivity. This phone offers a large backlit display and Optima HD technology delivering a rich visual and audio experience.

The T27G has adopted a paperless design, it has 7 programmable memory keys each with an on screen label and dual-colour LED for line status information. There are 3 pages for up to 21 keys in total, for users requiring access to even more feature keys the T27G supports up to 6 EXP20 expansion keypad modules for up to 228 additional keys.

# Yealink T29GN

## Overview

The T29GN is an executive IP phone which supports up to 16 SIP accounts and has a built in two-port Gigabit Ethernet switch. This phone offers a high resolution TFT colour display and Optima HD technology delivering a rich visual and audio experience along with a very user friendly interface. There is support for corded, Bluetooth (requires BT40) or wireless/DECT headsets supporting EHS (requires EHS36 adaptor).

# Yealink T40G

## Overview

The T40G offers users an affordable, feature-rich SIP desk-phone with a host of advanced capabilities. With support for up to 3 SIP accounts and 2 x Gigabit Ethernet ports for high-speed connectivity, the T40G is an ideal entry-level phone for business users.

Featuring a backlit graphical LCD display and Opus codec support, the T40G has superb audio quality and a rich visual experience. Thanks to its paperless design, it has 3 programmable memory keys for your own customisation, plus 3-way conferencing, BLF's and an intuitive user interface.

# Yealink T41S

## Overview

Yealink's new T41S marks the entry level model in the new T4S Series. Ideal for business users, the T41S delivers superb audio quality as well as a rich visual experience with a 2.7" graphical LCD screen and support for up to 6 SIP accounts.

Acting as a replacement for the T41PN model, the T41S offers a more enhanced performance with added extras such as USB port, Opus Codec Support and a faster, more responsive interface.

# Yealink T42S

## Overview

The Yealink T42S is a feature-rich SIP phone with Gigabit Ethernet pass through, superb audio quality and a rich visual experience. Acting as a replacement for the T42GN, the T42S offers a better overall performance with a faster, more responsive interface, an all-new USB port and Opus Codec support. Boasting unparalleled functionality and expansibility, the T42S comes ready for future Bluetooth, Wi-Fi and USB recording features.

## Skype for Business Edition

The Yealink T42 is also available in a UC edition, with Skype for Business firmware. Crafted with new features tailored for Microsoft© Skype for Business/Lync, communication can be extended for an improved experience with the collaboration of the following features: SFB Conference, Boss/Admin, Common Area Phone and Calendar in Outlook. With the wireless "Better Together over Ethernet" (BToE) feature users can seamlessly switch between the Skype for Business desktop client and T42GN phone.

# Yealink T46S

## Overview

## Yealink T46S

The Yealink T46S provides a feature-rich option for busy executives and professionals. With a 4.3" high resolution TFT colour display and built-in Gigabit Ethernet technology, this device enables rapid call handling and optional use of a Bluetooth USB dongle and Wi-Fi USB dongle.

The phone features 10 customisable buttons each with dual-colour illuminated LEDs for line status information (switch between 3 pages for up to 27 buttons in total) the labels are shown on the phones digital display meaning no more messy paper inserts.

For users who need to handle a high volume of calls, this phone is compatible with Yealink's EX40 expansion module, with support for up to 6 modules, users can add up to 240 extra customisable keys to their phone.

Acting as a replacement for the T46GN model, the T46S offers a more enhanced performance with added extras such as Opus Codec support and a faster, more responsive interface.

## Skype for Business Edition

The Yealink T46 is also available in a UC edition, with Skype for Business firmware. Equipped with a modern interface, users can enjoy familiar iconography and operation flows that reflect a true Skype for Business experience, helping to minimise complexity and maximise productivity. Designed with Microsoft© Skype for Business compatibility in mind, the T46GN comes loaded with premium features like SFB Conference, Boss/Admin and Outlook Calendar. With the wireless "Better Together over Ethernet" (BToE) feature users can seamlessly switch between the Skype for Business desktop client and T46GN phone.

# Yealink T48S

## Overview

Yealink's T48S IP phone offers a dynamic business communications solution for executives and professionals. Complete with Gigabit Ethernet technology and a large touch screen, this device offers a feature-rich option. With support for a variety of accessories including: EHS adaptor, BT40 USB dongle and WF40 Wi-Fi USB dongle, the T48S can be easily connected to wireless networks and a wide range of wired headsets including the Yealink YHS32.

The phone features 10 customisable buttons each with dual-colour illuminated LEDs for line status information (switch between 3 pages for up to 27 buttons in total) the labels are shown on the phones digital display meaning no more messy paper inserts.

For users who need to handle a high volume of calls, this phone is compatible with Yealink's EXP40 expansion module, with support for up to 6 modules, users can add up to 240 extra customisable keys to their phone.

Acting as a replacement for the T48GN model, the T48S offers a more enhanced performance with added extras such as Opus Codec support and a faster, more responsive interface.

# Yealink W52P - DECT

## Overview

Yealink IP DECT W52P is a SIP Cordless Phone that's designed for small business users who are looking for immediate cost savings with scalability and efficiency. The high-quality TFT colour display provides a clear view from all angles and the high definition speaker phone ensures clear hands-free communication. The SIP-W52P supports 4 simultaneous calls per base and offers professional features including intercom, transfer, 3-way conferencing and speed dial. It also works with well-known brand platforms including Broadsoft, Asterisk and 3CX and supports quick and easy configuration.

# Yealink W53P - DECT

## Overview

The Yealink W53P SIP cordless phone system combines quality, reliability and flexibility to offer users a scalable, efficient communications system. With support for up to 8 handsets and up to 8 concurrent calls, the W53P is supplied with a W53H DECT handset, and is also compatible with the W52H and W56H, enabling you to combine a variety of handsets to create the solution you require.

Ideal for small to medium-sized businesses, Yealink's W53P offers a long talk time of up to 18 hours, a high standby time of up to 200 hours and quick charging, enabling 10 minutes charging time to provide up to 2 hours talk time.

Thanks to built-in Opus codec support, the W53 package delivers excellent audio quality in both high-bandwidth and poor network conditions, plus with the ability to add up to 5 DECT repeaters, coverage can be extended to meet individual user requirements.

Please note: The W53 Package includes the W60B base station with the W53H DECT handset.

# Yealink W53P - DECT

## Overview

The Yealink W60P SIP cordless phone system combines quality, reliability and flexibility to offer users a scalable, efficient communications system. With support for up to 8 W52H/W53H/W56H handsets and up to 8 concurrent calls, the W60 features upgraded firmware and a range of features including call hold, call transfer, 3-way conferencing and support for Opus audio codec.

Ideal for small to medium-sized businesses, Yealink's W60P offers a long talk time of up to 30 hours, a high standby time of 400 hours and quick charging, enabling 10 minutes charging time to provide up to 2 hours talk time.

Thanks to built-in Opus codec support, the W60 package delivers excellent audio quality in both high-bandwidth and poor network conditions, plus with the ability to add up to 5 DECT repeaters, coverage can be extended to meet individual user requirements.

Please note: The W60 Packages comes complete with a W56H handset.

# Yealink CP920 – Conference Phone

## Overview

Ideal for small to medium sized conference rooms, the CP920 provides an excellent solution for business users who are looking for a high quality device with HD audio output.

Featuring a 3.1" graphical LCD backlit display, the CP920 has a 6 metre, 360° voice pick up range and utilises Yealink's renowned Noise Proof Technology, helping to reduce any interference from background noise.

With support for up to 5 parties, users have the flexibility to join calls across multiple devices including smartphones, PCs and tablets along with SIP and PSTN calls - offering a hybrid UC meeting solution.

# Yealink CP930W – Conference Phone

## Overview

The CP930W is Yealink's first wireless DECT conference phone. Based on reliable and secure DECT technology, the CP930W offers a truly flexible conferencing solution, freeing users from the limitations of power outlets and internet ports. With the option to pair with the W60B DECT base station, smart phones (via Bluetooth) or a PC/tablet (via micro USB), the CP930W offers users the capability to host meetings anywhere.

The Yealink CP930W delivers HD voice with a frequency range of 60Hz-16kHz and features Yealink's Noise Proof Technology which intelligently eliminates background noises. Designed with 3 microphone arrays, the device has a 20-foot, 360° HD voice pickup range, plus with a built-in rechargeable battery, it supports 24 hours of talk time.

With a DECT base coverage of up to 50m indoors and up to 300m outdoors, the CP930W can also be used in conjunction with 2 additional DECT handsets (W53H or W56H) when paired with the W60 base station. The CP930W can be purchased as a bundle with the W60B base station or as a stand-alone item.

# Yealink CP960 – Conference Phone

## Overview

The Yealink CP960 conference phone is ideal for medium to large sized meeting rooms. Powered by Android's 5.1 operating system, the CP960 combines simplicity of use with a variety of advanced features, all of which can be accessed through a 5" colour multi-touchscreen.

With optimal HD audio, this device provides crystal-clear audio quality for 5-way conferencing. With the option to connect an additional 2 wireless expansion microphones, coverage can be extended to suit individual requirements.

Complete with built-in WiFi and wired pairing, users are also able to connect their smartphone or PC/tablet via Bluetooth and micro-B port.

To offer the ultimate flexibility this solution is available to purchase as a standalone item or as a bundle with 2 CPW90 wireless expansion microphones included.
